Ünal Office Center Kat:5 Safranbolu Karabük

Unal Engineering

Ünal Mühendislik is a company established in 2001 to operate in the fields of Construction and Contracting, Restoration, Project, Design, Research and Construction Application. Its main purpose is Ancient Building Restoration, Housing and Reinforced Concrete Structures, and the company is constantly developing in this area.

Ünal Mühendislik has successfully signed many buildings such as Ancient Artifacts Restorations and Schools and Buildings in Safranbolu (Karabük) and the Western Black Sea Region, and still continues construction practices in this region and other cities. It mostly participated in the Ministry of Culture and Tourism, General Directorate of Foundations, Public Works and Settlement, etc. Public sectors and many private building applications.

Cengiz Ünal (Civil Engineer) has been continuing in the surrounding provinces, including the center of Safranbolu, under the name of Ünal Mühendislik, with the experience he gained by participating in restoration and building applications in various provinces since 1995.

As Unal Engineering;

MISSION

As a globally active company as a contracting company in the world of construction, working with a team spirit aiming at continuous development and success within the framework of respect for human and nature, as a construction, project and design company that presents the environment and human-sensitive architectural works in the best way without harming the nature. Our mission is to bring rising values to the economy and society in the construction sector by carrying out maintenance, repair and restoration within the framework of scientific rules, taking into account aesthetics and function without distorting the original of our values.

VISION

Contemporary and modern Turkey continues to contribute to the creation of the image.

CENGİZ ÜNAL - ÜNAL MÜHENDİSLİK

CONSTRUCTION CONTRACTING AND RESTORATION COMPANY

Ünal Mühendislik is a company established in 2001 to operate in the fields of Construction and Contracting, Restoration, Project, Design, Research and Construction Application. Its main purpose is Ancient Building Restoration, Housing and Reinforced Concrete Structures, and the company is constantly developing in this area.

Ünal Mühendislik has successfully signed many Old Building Restorations and buildings such as Schools, Hospitals, Universities in Safranbolu (Karabük) and the Western Black Sea Region and still continues construction practices in this region and other cities. It mostly participated in the Ministry of Culture and Tourism, General Directorate of Foundations, Public Works and Settlement, etc. Public sectors and many private building applications.

Cengiz Ünal (Civil Engineer) has been continuing in the surrounding provinces, including the center of Safranbolu, under the name of Ünal Mühendislik, with the experience he gained by participating in restoration and building applications in various provinces since 1995.

As Unal Engineering;

Developing innovative applications in the areas we operate at the highest level and using technology to create profitable companies in national and international space-efficient and be one of the most important actors that shape the economy of Turkey.

To be a pioneering group that aims to provide service to a wider audience by making a positive contribution to the society and the environment by keeping customer satisfaction at the forefront without sacrificing quality in its products and services, increasing its goals day by day with the successes it has achieved from its activities.

Leadership

As Unal Engineering;

We embrace change; We know that everyone, including ourselves, must do their part for change to come to life in the fastest and most trouble-free way.

As long as we can learn from our mistakes and do not repeat our mistakes, we take initiative and encourage use.

We define performance according to objective and measurable criteria and evaluate it fairly and consistently.

We definitely appreciate a job well done; we also provide feedback to improve each other.

We rationally defend the issues we believe to be correct, and work constructively to bring them to life.

Respect and Commitment

As Unal Engineering;

We do our job in the most accurate, right and wholehearted way.

We make clear promises, we definitely fulfill our promises, we report the results.

We constantly improve ourselves and our colleagues.

We act honestly, transparently and consistently in all our relationships, thus establishing long-term relationships based on trust.

Our Quality Policies

As Unal Engineering;

Fulfilling all legal requirements in the services we provide and presenting them to the service and use of our customers,

By continuously increasing the product and service quality; To present globally competitive products to the market with the advantage of domestic production,

To increase customer satisfaction; By testing the latest technology products with the latest technology test methods, making continuous improvement both a goal and a tool,

Organizing employee training by carrying out the necessary studies for the adoption of the quality policy and targets within the whole company

To make continuous improvement the most important target in every field of the company, is our most basic quality policy.

Directing the product variety and quality in line with consumer expectations and demands,

To act within the framework of the laws in force and to be sensitive at the maximum level,

Increasing employment, investing in people, training our employees, ensuring job satisfaction and increasing motivation,

To prioritize consumer satisfaction,

To provide production and distribution services at international standards,

Ensuring the formation of corporate culture,

To give importance to team work,

The main duties and responsibilities of our employees are to produce quality products that meet the demands of our consumers at the cost required by the competitive environment and to deliver them on time, and to do their work completely and correctly at the first time, aiming zero error, with the awareness of continuous improvement.
